INDEX

ACACIA in restoring body fluid, 561.
Adrenal cortex, hormone of, 670.
Adrenalectomy, double, and oestrous cycle, 292.
Adrenalin, depletion of muscle sugar by, 403.
ALLEN, W. F. An experimentally produced premature systolic arhythmia (pulsus bigeminus) in rabbits. II. Secondary factors which do not produce it, 190.
Anterior lobe and menstruation, 662.
APPELROT, S. Sex and seasonal variations in excitability of the cardio-inhibitory mechanism of frogs and toads, 242.
—— and A. J. CARLSON. The influence of the vago-sympathetic nerves on the ventriculo-aortic tonus in the turtle, 56.
Arteriosclerosis, experimental, in the rat, 620.

BACQ, Z. M. The action of abdominal sympathectomy on the growth of the albino rat and the weight of the genital organs, 601.
—— and S. DWORKIN. The action of parathyroid extract in sympathectomized animals, 614.
—— —— —— The heart rate after sympathectomy and vagotomy and the blood sugar as affected by posterior hypophyseal extracts (pitressin and pitocin), 605.
BARNES, B. O. See QUIGLEY and BARNES, 7.
Basal metabolism, effect of pituitary preparations on, 396.
BENEDICT, F. G. See RIDDLE, CHRISTMAN and BENEDICT, 111.
BERG, B. N. A study of the islands of Langerhans in vivo with observation on the circulation, 186.
BERNTHAL, T. G. Some observations upon changes in volume flow of blood accompanying changing respiratory conditions, 446.
Bigeminal pulse in rabbits, 190.
BISCHOFF, F. and M. L. LONG. Depletion of muscle sugar by adrenalin. II, 403.
BLALOCK, A. Observation upon the blood flow through skeletal muscle by the use of the hot wire anemometer, 554.
Blood chlorides and chlorides of edema fluid from superficial burn, 334.
——, factors in coagulation of, 1.
——, flow in muscles, hot wire anemometer for, 554.
——, pressure, venous, 294.
—— sugar changes, maternal and fetal, 178.
—— ——, heart rate and, after hypophyseal extracts, 605.
—— supply, curtailed, to brain, circulatory changes from, 371, 382.
—— volume and pressure in formation of lymph in frog, 91.
——, —— flow of, with changing respiratory conditions, 446.
BOUCKAERT, J. J. Massage of the thyroid gland and rate of denervated heart in the dog, 427.
—— and E. SOLOMON. Beta-tetrahydro-naphthylamine hyperthermia and fat metabolism, 417.
Brain, circulatory changes from curtailed blood supply to, 371, 382.
——, —— —— of, and respiration, 371, 382.
Brain, motor disturbances following lesions of cortex, 584.
BRITTON, S. W. Maternal and fetal blood sugar changes under various experimental conditions, 178.
BROWNELL, K. A. See HARTMAN, BROWNELL and HARTMAN, 670.

Buchwald, K. W. See Cori and Buchwald, 71.
Burns, superficial, nature and effects of, 302, 315, 325, 330, 334, 339.

Capillaries, permeability of, to protein, 98.
Capillary permeability, changes in, produced by burn, 315.
Carbon monoxide, effect of, on medullated nerve, 650.
Cardiac output in man, 263, 274.
Cardio-inhibitory mechanism, sex and seasonal variations in excitability of, 242.
Cardiovascular reactions to temperature changes, 263.
Carlson, A. J. See Appelrot and Carlson, 56.
——. See Kunde, D'Amour, Carlson and Gustavson, 630.
Chaffee, E. L. and E. Sutcliffe. The differences in electrical response of the retina of the frog and horned toad according to the position of the electrodes, 250.
Chlorides of edema fluid from superficial burn, blood chlorides and, 334.
Christman, G. See Riddle, Christman and Benedict, 111.
Chronaxie of nerve, temperature and, 139.
Circulation in islands of Langerhans, 186.
——, liver, vasomotor control of, 20.
Circulatory changes from curtailed blood supply to brain, 371, 382.
Coagulation of blood, factors in, 1.
Conklin, R. E. The formation and circulation of lymph in the frog: I. The rate of lymph production, 79. II. Blood volume and pressure, 91. III. The permeability of the capillaries to protein, 98.
Contraction frequency and energy expenditure, in striated muscle, 121.
Coombs, H. C. and F. H. Pike. The nervous control of respiration in kittens, 681.
Cori, C. F. and K. W. Buchwald. Effect of continuous intravenous injection of epinephrine on the carbohydrate metabolism, basal metabolism and vascular system of normal men, 71.
Cori, G. T. Effects of epinephrine on sugar utilization in animals under amytal anesthesia, 285.
Corner, G. W. The hormonal control of lactation. I. Non-effect of the corpus luteum. II. Positive action of extracts of the hypophysis, 43.
Corpus luteum, non-effect of, on lactation, 43.
Cortex, motor disturbances following lesions of, 584.
Cowgill, G. R., H. A. Rosenberg and J. Rogoff. Studies in the physiology of vitamins. XIV. The effect of administration of large amounts of water on the time required for development of the anorexia characteristic of a deficiency of the vitamin B complex, 537.

D'Amour, F. E. See Juhn, D'Amour, Carlson and Gustavson, 630.
——. See Juhn, D'Amour and Womack, 641.
Davis, H. See Forbes, Davis and Lambert, 142.
Death, thermic effect of, 473.
Dehydration by various means, 348, 364.
Doles, E. A. See Hinsey, Ranson and Doles, 573.
Drewyer, G. E. See Ivy, Kloster, Drewyer and Lueth, 35.
Dworkin, S. and M. Florkin. The effect of temperature upon chronaxie and recovery period of nerve, 139.
——. See Bacq and Dworkin, 605, 614.

Edema fluid formation induced by superficial burn, 325.
—— —— from superficial burn, composition of, 330.
Edwards, J. G. The renal tubule and glomerulus, 493.
Emery, F. E. See Griffith and Emery, 20.
Energy expenditure, contraction frequency and, in striated muscle, 121.
—— source in glycogen-poor muscle, 130.

Epinephrine, effect of, in normal men, 71.
——, —— ——, on sugar utilization during amytal anesthesia, 285.
Estrin injections, effect of, on basal metabolism, uterine endometrium, lactation, mating and maternal instincts in dog, 630.
Exercise, physiology of, 202.
Excitation and inhibition in spinal center, 142.
Eye, local adaptation in, 229.
——, synaptic reactions in, 211.
EYSTER, J. A. E. and W. J. MEEK. Studies on venous pressure, 294.

FAT metabolism, hyperthermia and, 417.
Fetal blood sugar changes, maternal and, 178.
FIROR, W. M. See HARTMAN, FIROR and GEILING, 662.
FISK, M. E. See UNDERHILL, KAPSINOW and FISK, 302, 315.
——. See UNDERHILL, FISK and KAPSINOW, 325, 334, 339.
——. See UNDERHILL and FISK, 330, 348, 364.
FLORKIN, M. See DWORKIN and FLORKIN, 139.
FLUHMANN, C. F. The induction of the pseudopregnancy vaginal reaction in spayed mice by the injection of human blood, 422.
Fluid of body, acacia in restoring, 561.
FORBES, A., H. DAVIS and E. LAMBERT. The conflict between excitatory and inhibitory effects in a spinal center, 142.
FOSTER, H. C. See IRVING and FOSTER, 429.
FRIEDMAN, J. L. and L. B. NICE. Multiple ovaries and the oestrous cycle in the white rat, 40.

GALL bladder function, 511.
GALLIVAN, D. See ROWE, GALLIVAN and MATTHEWS, 592.
Gastric acidity, influence of thyroid on, 626.
Gastro-intestinal tract, action of insulin on motility of, 7.
GAY, H. H. A comparison of the effects of low alveolar oxygen, of sodium cyanide and of sodium sulfide upon respiratory movements and the response of muscle to direct, indirect and reflex stimulation, 519.
GEILING, E. M. K. See HARTMAN, FIROR and GEILING, 662.
GELFAN, S. and R. W. GERARD. Studies of single muscle fibres. II. A further analysis of the grading mechanism, 412.
Genital organs, weight of, abdominal sympathectomy and, 601.
GERARD, R. W. See GELFAN and GERARD, 412.
Glomerulus, renal tubule and, 493.
GOETTSCH, M. Relationship between vitamin C and some phases of reproduction in the guinea pig, 64.
GRANIT, R. and P. HARPER. Comparative studies on the peripheral and central retina. II. Synaptic reactions in the eye, 211.
—— and W. VON AMMON. Comparative studies on the peripheral and central retina. III. Some aspects of local adaptation, 229.
GREELEY, C. E. and P. O. GREELEY. Circulatory changes during periodic ventilation with apneas produced by marked curtailment of blood flow to the brain, 382.
——. See GREELEY and GREELEY, 371.
GREELEY, P. O. and C. E. GREELEY. Circulatory changes during periodic breathing produced by moderate obstruction to the cerebral arteries, 371.
——. See GREELEY and GREELEY, 382.
GREEN, M. F. and M. M. KUNDE. The acidity of the gastric contents of normal, cretin and hyperthyroid rabbits, 626.
GRIFFITH, F. R., JR. and F. E. EMERY. The vasomotor control of the liver circulation, 20.
GROLLMAN, A. Physiological variations of the cardiac output in man:
X. The effect of variations in the environmental temperature on the pulse rate, blood pressure, oxygen

consumption, arterio-venous oxygen difference, and cardiac output of normal individuals, 263.
XI. The pulse rate, blood pressure, oxygen consumption, arterio-venous oxygen difference, and cardiac output of man during normal nocturnal sleep, 274.
Growth of rat, abdominal sympathectomy and, 601.
GUSTAVSON, R. G. See KUNDE, D'AMOUR, CARLSON and GUSTAVSON, 630.

HALPERT, B. See REWBRIDGE, HANKE and HALPERT, 511.
HANKE, M. T. See REWBRIDGE, HANKE and HALPERT, 511.
HARPER, P. See GRANIT and HARPER, 211.
HARTMAN, C. G., W. M. FIROR and E. M. K. GEILING. The anterior lobe and menstruation, 662.
HARTMAN, F. A., K. A. BROWNELL and W. E. HARTMAN. A further study of the hormone of the adrenal cortex, 670.
HARTMAN, W. E. See HARTMAN, BROWNELL and HARTMAN, 670.
Heart, denervated, rate of, massage of thyroid gland and, 427.
—— rate after sympathectomy and vagotomy, 605.
—— —— and blood sugar after hypophyseal extracts, 605.
Hemolysis, thermic effect of, 473.
HINSEY, J. C., S. W. RANSON and E. A. DOLES. Reversal in the crossed extension reflex in decerebrate, decapitate and spinal cats, 573.
Histamine and intestinal motility, 527.
Hormonal control of lactation, 43.
Hormone of adrenal cortex, 670.
Hormones, female and male, effects of simultaneous injections of, in capons, 641.
HUDDLESTON, O. L. The influence of retinal stimuli upon labyrinthine head-nystagmus of pigeons, 465.
Hyperthermia and fat metabolism, 417.
Hypophyseal extracts, effect of, on heart rate and blood sugar, 605.
Hypophysis, positive action of extracts of, on lactation, 43.

INHIBITION, excitation and, in spinal center, 142.
Insulin, action of, on motility of gastro-intestinal tract, 7.
Intestinal motility, histamine and, 527.
IRVING, L. and H. C. FOSTER. The respiratory quotient of resting mammalian muscle as shown by the eviscerated decapitated cat, 429.
IVY, A. C., G. KLOSTER, G. E. DREWYER and H. C. LUETH. The preparation of a secretin concentrate, 35.

JACOBSON, E. Electrical measurements of neuromuscular states during mental activities:
III. Visual imagination and recollection, 694.
IV. Evidence of contraction of specific muscles during imagination, 703.
JENKINS, T. A. See STEINHAUS and JENKINS, 202.
JUHN, M., F. D'AMOUR and E. B. WOMACK. The effects of simultaneous injections of the female and male hormones in capons, 641.

KAPSINOW, R. See UNDERHILL, KAPSINOW and FISK, 302, 315.
——. See UNDERHILL, FISK and KAPSINOW, 325, 334, 339.
KATZ, L. N. The rôle played by the ventricular relaxation process in filling the ventricle, 542.
KEITH, N. M. See WALKER and KEITH, 561.
KLOSTER, G. See IVY, KLOSTER, DREWYER and LUETH, 35.
KUNDE, M. M., F. E. D'AMOUR, A. J. CARLSON and R. G. GUSTAVSON. Studies on metabolism. VIII. The effect of estrin injections on the basal metabolism, uterine endometrium, lactation, mating and maternal instincts in the adult dog, 630.
——. See GREEN and KUNDE, 626.

LABYRINTHINE head-nystagmus, retinal stimuli and, 465.

Lactation, effect of estrin injections on, 630.
——, hormonal control of, 43.
LAMBERT, E. See FORBES, DAVIS and LAMBERT, 142.
LEPESCHKIN, W. W. The thermic effect of death and hemolysis, 473.
Liver circulation, vasomotor control of, 20.
LONG, M. L. See BISCHOFF and LONG, 403.
LUETH, H. C. See IVY, KLOSTER, DREWYER and LUETH, 35.
Lymph formation and circulation in frog, 79, 91, 98.

MACKAY, M. E. The action of histamine on the motility of different parts of the intestinal tract, 527.
Maternal and fetal blood sugar changes, 178.
MATTHEWS, H. See ROWE, GALLIVAN and MATTHEWS, 592.
MEEK, W. J. See EYSTER and MEEK, 294.
Menstruation, anterior lobe and, 662.
Mental activities, neuromuscular states during, 694, 703.
MESSER, A. C. See SHAW and MESSER, 13.
Metabolism, basal, effect of estrin injections on, 630.
——, ——, effect of pituitary preparations on, 396.
——, ——, exercise and, in dogs, 202.
——, fat, hyperthermia and, 417.
—— in pregnancy, 592.
—— response, differential, of sexes, 111.
MILLS, C. A. Do blood platelets, plasma, and tissues yield thrombin or tissue fibrinogen, 1.
Motor disturbances following lesions of cortex, 584.
Muscle fibres, single, 412.
——, glycogen-poor, source of energy in, 130.
——, reciprocal reaction of, 174.
——, resting, respiratory quotient of, 429.
——, striated, contraction frequency and energy expenditure in, 121.
Muscle sugar, depletion of, by adrenalin, 403.
Muscles, hot wire anemometer for blood flow in, 554.
——, peripheral, respiration and excitability of, 519.

NERVE, effect of temperature on chronaxie of, 139.
—— impulse, nature of, 650.
Nerves, vago-sympathetic, effect of, on cardiac tonus, 56.
Nervous control of respiration in kittens, 681.
Neuromuscular states during mental activities, 694, 703.
NICE, L. B. See FRIEDMAN and NICE, 40.
——. See SCHIFFER and NICE, 292.
Nitrogen metabolism in pregnancy, 592.

OESTROUS cycle, double adrenalectomy and, 292.
—— —— in rat, multiple ovaries and, 40.
Ovaries, multiple, and oestrous cycle in rat, 40.

PANCREAS, circulation in the islands of Langerhans, 186.
Parathyroid extract in sympathectomized animals, 614.
PIKE, F. H. See COOMBS and PIKE, 681.
Pituitary gland in rat, effects of extirpation of, 481.
—— lobe preparations, posterior, antagonistic action of, to insulin, 7.
—— preparations, effect of, on basal metabolism, 396.
Pregnancy, metabolism in, 592.
Pulse, bigeminal, in rabbits, 190.

QUIGLEY, J. P. and B. O. BARNES. Action of insulin on the motility of the gastro-intestinal tract. VI. Antagonistic action of posterior pituitary lobe preparations, 7.

RANSON, S. W. See HINSEY, RANSON and DOLES, 573.
Reciprocal reaction in cat as possible local mechanism, 174.

Reflex, crossed extension, reversal in, 573.
Renal tubule and glomerulus, 493.
Reproduction, effect of estrin injections on, 630.
—— in guinea pig, vitamin C and, 64.
Respiration and excitability of peripheral muscles, 519.
——, cutaneous, 13.
——, nervous control of, 681.
Respiratory quotient of resting muscle, 429.
Retina, electrical response of, 250.
——, peripheral and central, 211, 229.
Retinal stimuli and labyrinthine head-nystagmus, 465.
REWBRIDGE, A. G., M. T. HANKE and B. HALPERT. Further observations on the function of the gall bladder. Experiments with methylene blue, 511.
RICHTER, C. P. and G. B. WISLOCKI. Anatomical and behavior changes produced in the rat by complete and partial extirpation of the pituitary gland, 481.
RIDDLE, O., G. CHRISTMAN and F. G. BENEDICT. Differential response of male and female ring doves to metabolism measurement at higher and lower temperatures, 111.
RIZZOLO, A. Motor disturbances consequent upon experimental lesions of the cerebral cortex, 584.
ROGOFF, J. See COWGILL, ROSENBERG and ROGOFF, 537.
ROSENBERG, H. A. See COWGILL, ROSENBERG and ROGOFF, 537.
ROWE, A. W., D. GALLIVAN and H. MATTHEWS. The metabolism in pregnancy. IV. The nitrogen metabolism, 592.

SCHIFFER, A. L. and L. B. NICE. Double adrenalectomy and the oestrous cycle in the white rat, 292.
SCHMITT, F. O. On the nature of the nerve impulse. I. The effect of carbon monoxide on medullated nerve, 650.
Secretin concentrate, preparation of, 35.
SHAW, L. A. and A. C. MESSER. Cutaneous respiration in man. II. The effect of temperature and of relative humidity upon the rate of carbon dioxide elimination and oxygen absorption, 13.
SIEBERT, W. J. and R. S. SMITH. The effect of various anterior pituitary preparations upon basal metabolism in partially thyroidectomized and in completely thyroidectomized guinea pigs, 396.
Sleep, physiological variations during, 274.
SMITH, E. See SWEENEY and SMITH, 620.
SMITH, J. B. and J. TULGAN. Reciprocal reaction in the cat as a possible local mechanism. III. The reciprocal reaction of the biceps brachii and the triceps brachii, 174.
SMITH, P. W. and M. B. VISSCHER. On the source of energy for anaerobic contraction in glycogen-poor muscle, 130.
——. See VISSCHER and SMITH, 121.
SMITH, R. S. See SIEBERT and SMITH, 396.
SOLOMON, E. See BOUCKAERT and SOLOMON, 417.
Spayed mice, pseudo-pregnancy vaginal reaction in, 422.
Spinal center, excitation and inhibition in, 142.
Sympathectomized animals, parathyroid extract in, 614.
Sympathectomy, abdominal, and growth of rat, 601.
STEINHAUS, A. H. and T. A. JENKINS. Studies in the physiology of exercise. IV. Further concerning exercise and basal metabolism in dogs, 202.
Sugar utilization, effect of epinephrine on, in animals under amytal anesthesia, 285.
SUTCLIFFE, E. See CHAFFEE and SUTCLIFFE, 250.
SWEENEY, M. and E. SMITH. Experimental arteriosclerosis in the rat, 620.

TEMPERATURE and chronaxie of nerve, 139.

Temperature changes, cardiovascular reactions to, 263.
Thermic effect of death and hemolysis, 473.
Thyroid gland, massage of, and rate of denervated heart, 427.
——, influence of, on gastric acidity, 626.
Tissues, composition of, under influence of superficial burn, 339.
Tonus, cardiac, effect of vago-sympathetic nerves on, 56.
TULGAN, J. See STEIN and TULGAN, 174.

UNDERHILL, F. P. and M. E. FISK. Studies on the mechanism of water exchange in the animal organism:
IV. The composition of edema fluid resulting from a superficial burn, 330.
VII. An investigation of dehydration produced by various means, 348.
VIII. A study of dehydration by pilocarpine under varied dietary conditions, 364.
——, M. E. FISK and R. KAPSINOW. Studies on the mechanism of water exchange in the animal organism:
III. The extent of edema fluid formation induced by a superficial burn, 325.
V. The relationship of the blood chlorides to the chlorides of edema fluid produced by a superficial burn, 334.
VI. The composition of tissues under the influence of a superficial burn, 339.
——, R. KAPSINOW and M. E. FISK. Studies on the mechanism of water exchange in the animal organism:
I. The nature and effects of superficial burns, 302.
II. Changes in capillary permeability induced by a superficial burn, 315.
Uterine endometrium, effect of estrin injections on, 630.

VAGINAL reaction in spayed mice, 422.
Vasomotor control of liver circulation, 20.
Venous pressure, 294.
Ventricle, relaxation process in filling of, 542.
VISSCHER, M. B. and P. W. SMITH. The relation between contraction frequency and lactate accumulation, and its bearing upon the economy of tension production and maintenance in striated muscle, 121.
——. See SMITH and VISSCHER, 130.
Vitamin B deficiency, effect of water-intake in, 537.
—— C and reproduction in guinea pig, 64.
Vitamins, physiology of, 537.
VON AMMON, W. See GRANIT and VON AMMON, 229.

WALKER, M. A. and N. M. KEITH. The effect of a solution of acacia in restoring diminished body fluid, 561.
Water exchange, mechanism of, 302, 315, 325, 330, 334, 339, 348, 364.
——-intake, effect of, in vitamin B deficiency, 537.
WISLOCKI, G. B. See RICHTER and WISLOCKI, 481.
WOMACK, E. B. See JUHN, D'AMOUR and WOMACK, 641.

CONTENTS

No. 1. October, 1930

Do Blood Platelets, Plasma, and Tissues Yield Thrombin, or Tissue Fibrinogen? *C. A. Mills* 1

Action of Insulin on the Motility of the Gastro-intestinal Tract. VI. Antagonistic Action of Posterior Pituitary Lobe Preparations. *J. P. Quigley and B. O. Barnes* 7

Cutaneous Respiration in Man. II. The Effect of Temperature and of Relative Humidity upon the Rate of Carbon Dioxide Elimination and Oxygen Absorption. *Louis A. Shaw and Anne C. Messer* 13

The Vasomotor Control of the Liver Circulation. *Fred R. Griffith, Jr. and F. E. Emery* 20

The Preparation of a Secretin Concentrate. *A. C. Ivy, G. Kloster, G. E. Drewyer and H. C. Lueth* 35

Multiple Ovaries and the Oestrous Cycle in the White Rat. *J. L. Friedman and L. B. Nice* 40

The Hormonal Control of Lactation. I. Non-Effect of the Corpus Luteum. II. Positive Action of Extracts of the Hypophysis. *George W. Corner* 43

The Influence of the Vago-sympathetic Nerves on the Ventriculo-Aortic Tonus in the Turtle. *Samuel Applerot and A. J. Carlson* 56

Relationship Between Vitamin C and Some Phases of Reproduction in the Guinea Pig. *Marianne Goettsch* 64

Effect of Continuous Intravenous Injection of Epinephrine on the Carbohydrate Metabolism, Basal Metabolism and Vascular System of Normal Men. *C. F. Cori and K. W. Buchwald* 71

The Formation and Circulation of Lymph in the Frog. I. The Rate of Lymph Production. *Ruth E. Conklin* 79

The Formation and Circulation of Lymph in the Frog. II. Blood Volume and Pressure. *Ruth E. Conklin* 91

The Formation and Circulation of Lymph in the frog. III. The Permeability of the Capillaries to Protein. *Ruth E. Conklin* 98

Differential Response of Male and Female Ring Doves to Metabolism Measurement at Higher and Lower Temperatures. *Oscar Riddle, Guinevere Christman and Francis G. Benedict* 111

The Relation between Contraction Frequency and Lactate Accumulation, and Its Bearing upon the Economy of Tension Production and Maintenance in Striated Muscle. *Maurice B. Visscher and Paul W. Smith* 121

On the Source of Energy for Anaerobic Contraction in Glycogen-Poor Muscle. *Paul W. Smith and Maurice B. Visscher* 130

The Effect of Temperature upon Chronaxie and Recovery Period of Nerve. *S. Dworkin and M. Florkin* 139

The Conflict between Excitatory and Inhibitory Effects in a Spinal Center. *A. Forbes, H. Davis and E. Lambert* 142
Reciprocal Reaction in the Cat as a Possible Local Mechanism. III. The Reciprocal Reaction of the Biceps Brachii and the Triceps Brachii. *John Bethune Stein and Joseph Tulgan* 174
Maternal and Fetal Blood Sugar Changes under Various Experimental Conditions. *S. W. Britton* 178
A Study of the Islands of Langerhans in Vivo with Observations on the Circulation. *Benjamin N. Berg* 186
An Experimentally Produced Premature Systolic Arhythmia (Pulsus Bigeminus) in Rabbits. II. Secondary Factors Which Do Not Produce It. *William F. Allen* 190
Studies in the Physiology of Exercise. IV. Further Concerning Exercise and Basal Metabolism in Dogs. *Arthur H. Steinhaus and Thomas A. Jenkins* 202
Comparative Studies on the Peripheral and Central Retina. Part II. Synaptic Reactions in the Eye. *Ragnar Granit and Phyllis Harper* 211
Comparative Studies on the Peripheral and Central Retina. III. Some Aspects of Local Adaptation. *Ragnar Granit and Winona von Ammon* 229
Sex and Seasonal Variations in Excitability of the Cardio-Inhibitory Mechanism of Frogs and Toads. *Samuel Appelrot* 242
The Differences in Electrical Response of the Retina of the Frog and Horned Toad According to the Position of the Electrodes. *E. L. Chaffee and Evelyn Sutcliffe* 250

No. 2. November, 1930

Physiological Variations of the Cardiac Output in Man. X. The Effect of Variations in the Environmental Temperature on the Pulse Rate, Blood Pressure, Oxygen Consumption, Arterio-Venous Oxygen Difference, and Cardiac Output of Normal Individuals. *Arthur Grollman* 263
Physiological Variations in the Cardiac Output of Man. XI. The Pulse Rate, Blood Pressure, Oxygen Consumption, Arterio-Venous Oxygen Difference, and Cardiac Output of Man During Normal Nocturnal Sleep. *Arthur Grollman* 274
Effect of Epinephrine on Sugar Utilization in Animals under Amytal Anesthesia. *G. T. Cori* 285
Double Adrenalectomy and the Oestrous Cycle in the White Rat. *A. L. Schiffer and L. B. Nice* 292
Studies on Venous Pressure. *J. A. E. Eyster and Walter J. Meek* 294
Studies on the Mechanism of Water Exchange in the Animal Organism. I. The Nature and Effects of Superficial Burns. *Frank P. Underhill, Robert Kapsinow and Merl E. Fisk* 302
Studies on the Mechanism of Water Exchange in the Animal Organism. II. Changes in Capillary Permeability Induced by a Superficial Burn. *Frank P. Underhill, Robert Kapsinow and Merl E. Fisk* 315
Studies on the Mechanism of Water Exchange in the Animal Organism. III. The Extent of Edema Fluid Formation Induced by a Superficial Burn. *Frank P. Underhill, Merl E. Fisk and Robert Kapsinow* 325
Studies on the Mechanism of Water Exchange in the Animal Organism. IV. The Composition of Edema Fluid Resulting from a Superficial Burn. *Frank P. Underhill and Merl E. Fisk* 330

Studies on the Mechanism of Water Exchange in the Animal Organism. V. The Relationship of the Blood Chlorides to the Chlorides of Edema Fluid Produced by a Superficial Burn. *Frank P. Underhill, Merl E. Fisk and Robert Kapsinow* 334
Studies on the Mechanism of Water Exchange in the Animal Organism. VI. The Composition of Tissues under the Influence of a Superficial Burn. *Frank P. Underhill, Merl E. Fisk and Robert Kapsinow* 339
Studies on the Mechanism of Water Exchange in the Animal Organism. VII. An Investigation of Dehydration Produced by Various Means. *Frank P. Underhill and Merl E. Fisk* 348
Studies on the Mechanism of Water Exchange in the Animal Organism. VIII. A Study of Dehydration by Pilocarpine under Varied Dietary Conditions. *Frank P. Underhill and Merl E. Fisk* 364
Circulatory Changes during Periodic Breathing Produced by Moderate Obstruction to the Cerebral Arteries. *Paul O. Greeley and Charles E. Greeley* 371
Circulatory Changes during Periodic Ventilation with Apneas Produced by Marked Curtailment of Blood Flow to the Brain. *Charles E. Greeley and Paul O. Greeley* 382
The Effect of Various Anterior Pituitary Preparations upon Basal Metabolism in Partially Thyroidectomized and in Completely Thyroidectomized Guinea Pigs. *Walter J. Siebert and Robert S. Smith* 396
Depletion of Muscle Sugar by Adrenalin. II. *Fritz Bischoff and M. Louisa Long* 403
Studies of Single Muscle Fibres. II. A Further Analysis of the Grading Mechanism. *S. Gelfan and R. W. Gerard* 412
Beta-Tetra-Hydro-Naphtylamine Hyperthermia and Fat Metabolism. *Jean J. Bouckaert and E. Solomon* 417
The Induction of the Pseudo-Pregnancy Vaginal Reaction in Spayed Mice by the Injection of Human Blood. *C. Frederic Fluhmann* 422
Massage of the Thyroid Gland and Rate of Denervated Heart in the Dog. *J. J. Bouckaert* 427
The Respiratory Quotient of Resting Mammalian Muscle as Shown by the Eviscerated Decapitated Cat. *Laurence Irving and H. C. Foster* 429
Some Observations upon Changes in Volume Flow of Blood Accompanying Changing Respiratory Conditions. *Theodore G. Bernthal* 446
The Influence of Retinal Stimuli upon Labyrinthine Head-Nystagmus of Pigeons. *O. Leonard Huddleston* 465
The Thermic Effect of Death and Hemolysis. *W. W. Lepeschkin* 473
Anatomical and Behavior Changes Produced in the Rat by Complete and Partial Extirpation of the Pituitary Gland. *Curt P. Richter and George B. Wislocki* 481
The Renal Tubule and Glomerulus. *J. Graham Edwards* 493

No. 3. December, 1930

Further Observations on the Function of the Gall Bladder. Experiments with Methylene Blue on the Dog. *Allan G. Rewbridge, Milton T. Hanke and Béla Halpert* 511
A Comparison of the Effects of Low Alveolar Oxygen, of Sodium Cyanide and of Sodium Sulfide upon Respiratory Movements and the Response of Muscle to Direct, Indirect and Reflex Stimulation. *Harold H. Gay* 519

The Action of Histamine on the Motility of Different Parts of the Intestinal Tract. *Margaret E. MacKay*..... 527
Studies in the Physiology of Vitamins. XIV. The Effect of Administration of Large Amounts of Water on the Time Required for Development of the Anorexia Characteristic of a Deficiency of the Vitamin B Complex. *George. R. Cowgill, H. A. Rosenberg and J. Rogoff*..... 537
The Rôle Played by the Ventricular Relaxation Process in Filling the Ventricle. *Louis N. Katz*..... 542
Observation upon the Blood Flow through Skeletal Muscle by the Use of the Hot Wire Anemometer. *Alfred Blalock*..... 554
The Effect of a Solution of Acacia in Restoring Diminished Body Fluid. *Maurice A. Walker and Norman M. Keith*..... 561
Reversal in the Crossed Extension Reflex in Decerebrate, Decapitate and Spinal Cats. *J. C. Hinsey, S. W. Ranson and E. A. Doles*..... 573
Motor Disturbances Consequent upon Experimental Lesions of the Cerebral Cortex. *Attilio Rizzolo*..... 584
The Metabolism in Pregnancy. IV. The Nitrogen Metabolism. *Allan Winter Rowe, Dorothy Gallivan and Helen Matthews*..... 592
The Action of Abdominal Sympathectomy on the Growth of the Albino Rat and the Weight of the Genital Organs. *Z. M. Bacq*..... 601
The Heart Rate after Sympathectomy and Vagotomy and the Blood Sugar as Affected by Posterior Hypophyseal Extracts (Pitressin and Pitocin). *Z. M. Bacq and S. Dworkin*..... 605
The Action of Parathyroid Extract in Sympathectomized Animals. *Z. M. Bacq and S. Dworkin*..... 614
Experimental Arteriosclerosis in the Rat. *Morrow Sweeney and Erma Smith*..... 620
The Acidity of the Gastric Contents of Normal Cretin and Hyperthyroid Rabbits. *M. F. Green and M. M. Kunde*..... 626
Studies on Metabolism. VIII. The Effect of Estrin Injections on the Basal Metabolism, Uterine Endometrium, Lactation, Mating and Maternal Instincts in the Adult Dog. *M. M. Kunde, F. E. D'Amour, A. J. Carlson and R. G. Gustavson*..... 630
The Effects of Simultaneous Injections of the Female and Male Hormones in Capons. *Mary Juhn, F. D'Amour and E. B. Womack*..... 641
On the Nature of the Nerve Impulse. I. The Effect of Carbon Monoxide on Medullated Nerve. *Francis O. Schmitt*..... 650
The Anterior Lobe and Menstruation. *Carl G. Hartman, Warfield M. Firor and E. M. K. Geiling*..... 662
A Further Study of the Hormone of the Adrenal Cortex. *Frank A. Hartman, Katherine A. Brownell and Warren E. Hartman*..... 670
The Nervous Control of Respiration in Kittens. *Helen C. Coombs and F. H. Pike*..... 681
Electrical Measurements of Neuromuscular States During Mental Activities. III. Visual Imagination and Recollection. *Edmund Jacobson*..... 694
Electrical Measurements of Neuromuscular States During Mental Activities. IV. Evidence of Contraction of Specific Muscles During Imagination. *Edmund Jacobson*..... 703
Index..... 713
